M.A. 5 COTTON.

With a view to undertake adequate and effective measures for preserving the purity of M. A. 5 cotton, a meeting was held in the Office of the Secretary, Food and Civil Supply Department, Government of Mysore, on 8th March 1951. Sri T. P. Barat, Textile Commissioner to the Government of India, Sri T. B. Palal, Director (Cotton), Office of the Textile Commissioner, Government of India, besides the Director of Civil Supplies, Director of Agriculture, Deputy Director of Agriculture, Assistant Controller of Civil Supplies, Government of Mysore, were present at the meeting. Representatives of the Krishnarajendra

Mills, Ltd., Mysore, Benny Mills, and Minerva Mills, Ltd., Bangalore, the Davangere Cotton Mills, Sri Shankara Textile Mills, and Ganesh Textile Mills, Davangere, were also present.

It was unanimously agreed that M.A. 5 cotton certified by the Agricultural Department, Government of Mysore, was assured of complete purity and that no cotton other than the certified M.A. 5 cotton can be traded in as M.A. 5 of Mysore nor can be accepted as M.A. 5 cotton by any manufacturer or dealer. It was resolved that the only authority to certify M.A. 5 cotton will be the Agricultural Department, Government of Mysore. The Director of Cotton agreed that the Textile Commissioner's Committee in Bombay will not undertake to grant certificates in respect of M.A. 5.

It was agreed that a Regional Cotton Committee be formed forthwith consisting of three representatives of the mills and three representatives of the trade. This Regional Committee will supervise the Cotton control in respect of Mysore State and any infringement to the Cotton control or if any mixings of Mysore cotton take place, the same will be investigated by the Committee and such action as the Regional Committee may think proper should be taken to deal with any malpractices.

With a view to enabling the Mysore State mills to cover their cotton requirements of Mysore State, the Director (Cotton) agreed that no allocations of Mysore cottons other than M.A. 5 will be made to outside mills.

The Director (Cotton) submitted to the meeting that it was imperative that a pressing factory be established in the Arsikere area without any delay because in the absence of a pressing factory in this area, ginned cotton had to be transported over a fairly long distance which meant an added cost either to the cotton grower or to the consumer of this cotton. He agreed that the Textile Commissioner will issue an administrative order permitting the Director of Agriculture and the Controller of Civil Supplies to issue transport permits for internal movement of lint. He also promised to consider the requirements of the Mysore State Mills in respect of other cottons for which a separate meeting would be held.

Press Note.

HEALTH OF LIVES-TOCK IN THE MYSORE STATE DURING MARCH 1951.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Anthrax, Hæmorrahagic-septicæmia, Foot and Mouth, Sheep-pox, Ranikhet, Contagious-goat, pleuro-pneumonia and Rabies were encountered in the State during March 1951. Altogether 177 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 183 villages during the previous month. The number of outbreaks was highest in Mysore, Tumkur and Kolar Districts, while Shimoga, Mandya and Chikmagalur Districts were least affected. These diseases accounted for 920 attacks, of which, 656 succumbed as against 2,241 attacks and 1,281 deaths during the previous month. The departmental staff conducted 37,008 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth.

disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Sixteen outbreaks of Rinderpest of which four were among sheep and goats were registered in Bangalore South, Magadi Pavagada, Krishnarajanagar, Chitaldrug, Molakalmuru, Channagiri, Honnali and Tirthahalli Taluks accounting for 78 attacks among cattle and 286 attacks among sheep and goats of which 31 cattle and 188 sheep and goats succumbed. The increase in the incidence of Rinderpest is mainly due to the congregation of cattle in the Rampur cattle fair in Honnali Taluk and Sugganahalli cattle fair in Magadi Taluk, in both of which the disease broke out and disseminated the infection to other villages. Nevertheless, prompt measures of control were undertaken by the Department to check its spread and 5,524 cattle and 1,240 sheep and goats in the infected villages and 17,514 cattle and 594 sheep and goats in the 72 neighbouring villages were protected against this disease. The disease appeared to be well under control at the end of the month under report.

Prevalence of an obscure disease characterised by Gastroentritis among cattle and buffaloes in Hassan and Chikmagalur Districts was reported during the month. The staff of the Department have protected 1,104 animals during the month in these districts against the disease.

Diseases caused by internal parasites were reported from 86 villages resulting in 46 deaths as against 100 villages accounting for 67 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,238 animals as against 3,308 animals during the previous month.

The rest of the live-stock remained free from diseases during the month and, fodder and water were generally available throughout the State.

LIVE STOCK CENSUS—1951.

The Eleventh Quinquennial Census of Live Stock (Agricultural Census) will take place in the month of May 1951 in the State, and 31st of May has been fixed as the final date. Action has been taken already to complete the preliminaries such as division of the area into suitable blocks and appointment of Enumerators and Supervisors. The Census will be conducted both in Urban and in Rural Areas.

Our State is primarily an agricultural country. Cattle wealth is an essential condition for ensuring agricultural prosperity and improvement in agricultural production.

No large schemes or plans for the improvement of Live Stock on scientific lines can be undertaken, in the absence of reliable statistics relating to Live Stock. It is, therefore, of the first degree of importance that statistics should be collected in as accurate and correct a manner as possible. The public are requested to co-operate with the Enumerators and give them correct information when they come to them for collection of information relating to Live Stock in connection with the ensuing Live Stock Census, 1951.

Rehabilitation of the Ex-Servicemen of Demobbed Units of the Mysore State Forces.

The *Ad-hoc* Committee, constituted by the Government of Mysore, for the drafting of the schemes for the rehabilitation of the released personnel of the Mysore State Forces, have, at their last meeting held on 3rd May 1951, decided to recommend to the Government the following schemes and forms of assistance :—

(1) The establishment of a General Motor Transport and Servicing Co-operative Concern at Bangalore with provision for repair and maintenance of automobiles and tractors, running of one or two bus lines and for maintenance of a fleet of taxies and auto-riksha service at an approximate investment of about Rs. 6,00,000.

(2) The establishment of Motor Vehicle and Tractor repair and maintenance workshops in the District Headquarters of Bangalore, Mysore, Shimoga and Chitaldrug, with an approximate investment of Rs. 6 to 8 lakhs. These are proposed to be started on a co-operative basis.

The initial finance is to be provided by the Government, part of which would be outright grant and the balance as loan recoverable in easy instalments.

The details are being worked out and comprehensive schemes will be submitted to the Government of India for sanction of necessary funds.

(3) Two land colonisation schemes to absorb 200 to 250 men, in Shimoga District and in Hunsur Taluk, Mysore District. For the men who join up these schemes, lands will be given free of cost and additional facilities up to about Rs. 2,500 per family will be provided for, and a portion of this would be outright grant and balance to be recovered in easy instalments. Further educational and medical facilities also will be provided for by the Government. These settlements will be provided with all facilities to become self-sufficient units as far as possible.

(4) Smaller units of settlements on land on approximately the same basis at other places where land is available is also being considered.

(5) *Technical Training* :—For those coming up for technical training, the Committee has decided to recommend assistance up to Rs, 1,000 per ex-serviceman half of which would be given as stipend during training period and the balance would be paid as equipment grant after the completion of the training and further assistance and help to start on their own. For those who are absorbed into regular employment after their training, an outfit grant of Rs. 100 is to be recommended.

(6) For individual business and trade to be started by ex-servicemen, it was decided to recommend concession similar to those offered to refugees involving financial assistance of Rs. 500 to 1,000 depending on the merit of each trade or business.

(7) *Miscellaneous form of assistance* :—It is proposed to give a few licenses for retail cloth shops and for running one or two hotels in Bangalore and Mysore, the financial assistance depending on the number of ex-servicemen absorbed and on merit of each case.

So far, over 100 ex-servicemen and 14 cadets have been absorbed in the Police Department and about 100 more have been absorbed in the various Government and private industrial concerns. Several private industrial concerns have come forward to give technical training and have offered to absorb trained men later in their concerns. Arrangements are also being made for training and subsequent employment in the Mysore Iron and Steel Works, Bhadravati, and other Government industrial concerns and training institutions.

All the recently released officers and men of the Mysore State Forces, who have not yet registered their names, are requested once again to do so, immediately for the various schemes at the Office of the Assistant Director of Rehabilitation of Ex-Servicemen of Mysore State Forces, Hebbal, Bangalore 6.

The co-operation of all businessmen and industrialists in the State is invited in this urgent and important task of rehabilitating the ex-officers and men of our army.

A conference was held in the Chambers of the Honourable the Chief Minister at 10-30 A.M. on the 14th May 1951.

where the policy of the Mysore Government in regard to the disposal of sandalwood was discussed.

The conference was attended to by the Hon'ble Chief Ministers of Madras and Mysore, the Hon'ble Ministers for Industries of both the Madras and Mysore Governments and the Hon'ble Minister in charge of the Forest Department of the Government of Mysore. The concerned Heads of Departments and the respective Secretaries of both the Administrations were also present.

The main point that came up for discussion was the desirability of forming a Joint Advisory Board to consider mutual problems affecting the interests of the two Governments in respect of sandalwood revenue and to safeguard the interests of dealers. The policy of the Mysore Government in regard to the maintenance of price levels, the rationale of the bids offered by them at sandalwood auctions held by the Madras Government, the justification for the sales effected through agents for *bona fide* domestic purposes and the reasons for exporting sandalwood (instead of oil) to the U.S.A. were fully explained and certain misconceptions which the Madras Government appear to have entertained in regard to these matters were removed. It was made clear that the policy of the Mysore Government did not in any way militate against the interests of Madras State and that, in fact, it was conceived in the best interests of both the administrations as well as those of dealers and distillers. While the Mysore State was quite willing to co-operate with its sister administration in the formation of a Joint Advisory Board to safeguard the interests of the industry in general, it was decided that the reaction of the trade to the formation of such a Board may first be ascertained and its representations examined jointly by the respective Officers of both Governments as well as those of Coorg before taking a final decision.

Sri Kasturbhai Lalbhai's Report on the State-owned and State-aided Industrial Concerns in Mysore.

In accordance with the desire of the Government of India to formulate a co-ordinated policy in regard to the management and development of the existing State-owned and State-sponsored industries and the starting of new ones, Sri Kasturbhai Lalbhai, at the instance of the Ministry of States, visited Mysore in January 1951 and undertook a survey of the several industrial concerns. Sri G. Swaminathan, Officer on Special Duty, Ministry of States, was associated with Sri Kasturbhai Lalbhai in this enquiry.

All the State-owned and State-aided concerns in Mysore came under review and most of them were visited by Sri Kasturbhai Lalbhai in company with the officers of the Mysore Government and members of the respective managements.

Sri Kasturbhai Lalbhai's report to the Government of India, besides dealing with questions of industrial policy and matters of general importance, contains specific reports on the individual concerns reviewed by him, and his detailed recommendations in respect of each of them.

Commenting on the bold industrial policy pursued by by the State, Sri Kasturbhai Lalbhai has observed that many of the existing industries could never have been started but for the State Governments' initiative. He points out that the industrialisation of the State on an organised basis commenced about 30 years ago with the establishment of the Iron and Steel Works and the Mysore Soap and Sandalwood Oil Factories, and that considerable expansion in industrial activity took place in the decade 1931-41 when such enterprises as Cement, Paper, Porcelain, Electrical Goods, Silk Weaving, Sugar, Fertilisers, Vegetable Products, etc., were established. He remarks that Mysore is one of the few States where a definite policy of fostering the growth and development of industries was adopted several decades ago and has been consistently adhered to. In support of this observation, he points out that as on 1st April 1950, the Government of Mysore have invested Rs. 519·78 lakhs in State-owned undertakings, Rs. 83·54 lakhs in Joint-Stock Companies and have advanced Rs. 30 lakhs to undertakings in which they have no share holding interest. With a view to enable private enterprise to participate in industrial developments, Government have been affording liberal facilities such as water, electricity, land, etc., to private concerns either free of charge or at concessional rates, and have also been taking shares varying from 9 per cent to 62 per cent of the total paid-up capital. In order to safeguard the interests of the investing public, the Government have closely associated themselves with the management of aided concerns, have fixed the number of Government Directors and in some cases have stipulated that the Chairman and Managing Director should be the Government's nominee and that the appointment of the General Manager and/or the Secretary should have the approval of Government. They have also reserved the right (by provision in the Articles of Association) to get the accounts of these concerns audited independently at their discretion.

Dealing with the part played by electric power, in the industrial development of the State, Sri Kasturbhai Lalbhai points out that not only was Mysore the first State in India to generate hydro-electric power but that is still in the forefront where the production and utilisation of electric power is concerned.

The following are the main comments and recommendations made by Sri Kasturbhai Lalbhai in his report.

A. STATE-OWNED AND STATE-MANAGED INDUSTRIES.

1. *Administrative set-up.*—Management by the State Government as it has been evolved in Mysore, has served a useful purpose in developing the industries and improving the economic condition of the State. The powers of the respective Board of Management are, however, so circumscribed that they have often to seek the formal approval of Government on relatively petty matters. If the concerns are to prospor and develop further, it is essential that the managements of the concerns should be given wider powers to take decisions in all matters other than those involving large questions of policy or financial commitment in excess of specified limits.

The General Managers should, similarly, also be given wider powers and should not be saddled with responsibility over too large a field.

The present set-up under which the State-owned industries are divided into three broad groups each under a Board of Management does not work satisfactorily. Each concern should have its own General Manager and a Board of Directors and there should be a proper separation of functions between the General Managers and the respective

199

boards, the latter dealing only with questions of policy and not with matters pertaining day-to-day administration.

The existing arrangement under which departmental officers such as the Director of Chemical and Metallurgical Industries and the Chief Electrical Engineer are, in addition to their normal departmental work, required to perform the duties of Chairman and Managing Directors in a number of Government concerns cannot be expected to work satisfactorily. It would conduce to greater efficiency and better results if each Goverement-owned concern has its own officers.

With a view to co-ordinate and review the activities of the different Board of Directors and to advise Government on important policy matters, a high powered Directorate of Industries should be set up composed of highly competent persons specially selected for their business ability, industrial experience or expert technical knowledge. This body will take final decisions without reference to Government on practically all administrative matters and will have to refer to Government only questions involving financial commitment for capital expenditure beyond a specified limit.

2. *Accounting Arrangements.*—The annual profit and loss account and balance sheet are not being prepared in a manner comparable to that followed in Joint-Stock Companies generally. Government should lay down a clear procedure for the exhibition of the financial results of the working of the State-owned undertakings in the exact manner followed by other commercial and industrial concerns.

3 *Gradual Conversion of State-owned Concerns into Joint-Stock Companies.* The management and ownership of the State-owned and State-managed concerns which are not basic or key industries may, as soon as they are well established and reach a stage at which they could best be developed further by private enterprise, be transferred to public limited companies to be floated for the purpose. The general policy of the State in regard to the less important industries should be to withdraw at a proper stage from direct participation either in the capital or in the management of such concerns with a view to stimulate private enterprise.

B. STATE-AIDED INDUSTRIES.

1 *Control by Government.* Although the close association of the State Government with the management of the respective concerns, appears to have worked satisfactorily in the past, the continuance of the measure of control thus exercised would not be a matter of sound policy. It should be the aim of the State Government to enable the State-aided concerns to do away with Government participation and control at a convenient opportunity so that private enterprise may play its part and the concerns may develop on their own. So long as the Government interests in the concerns continue to be appreciable, they may retain the following powers:—

(*a*) The right to veto proposals to capital expenditure exceeding Rs. 1 lakh.

(*b*) Prior consultation in regard to the proposals for borrowing money from outside concerns.

(*c*) Right to conduct financial investigation and technical inspection into the working of the concerns where the circumstances justify this course.

2 *Grant of Financial Assistance.* It is desirable in the interests of the Government themselves to adopt a well defined policy for sanctioning loans to industrial concerns or guaranteeing the loans made by Banks.

Until a State Financial Corporation comes into being and takes over the responsibility for dealing with the requests for financial assistance from industrial concerns, the State Government should set up an "Industrial Fund", the administration of this Fund being entrusted to the High Powered Industries Directorate already referred to.

While considering applications for assistance, the main considerations should be, not so much the value of the security offered, although this is important, but the concern's ability to repay, the quality of the management and the importance of the industry to the country's economy.

Sri Kasturbhai Lalbhai has also examined the various development schemes drawn up by the Government of Mysore for the expansion of their industries and has made useful suggestions in respect of each.

The various recommendations made by Sri Kasturbhai Lalbhai in his report are being examined by the Government of Mysore and steps have already been taken to implement some of them.

HEALTH OF LIVE-STOCK IN THE STATE DURING APRIL 1951.

In their order of severity, outbreaks of Rinderpest, Black quarter, Anthrax, Hæmorrahagic-septicæmia, Foot and Mouth, Sheep-pox, Ranikhet and Contagious-goat pleuro-pneumonia were encountered in the State during April 1951. Altogether 135 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 177 villages during the previous month. The number of out-breaks was highest in Mysore, Kolar and Bangalore Districts, while Chikmagalur, Hassan and Mandya were least affected. These diseases accounted for 678 attacks, of which 519 succumbed as against 920 attacks and 656 deaths during the previous month. The Departmental staff conducted 21,265 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention other prophylactic measures were adopted against Foot and Mouth disease.

Twelve outbreaks of Rinderpest of which three were among sheep and goats were registered in Kadur, Narasimharajapura, Koppa, Honnali and Chitaldrug Taluks accounting for 94 attacks among cattle and 125 among sheep, of which 58 cattle and 70 sheep succumbed. The spread of Rinderpest during the month is attributed to the infection at Rampur Cattle Fair in Honnali Taluk during February last. Prompt measures of control are being undertaken by the Department to check its further spread and so far 1,633 cattle and 905 sheep in the infected villages and 6,481 cattle and 249 sheep in 29 neighbouring villages have been protected against this disease.

Diseases caused by internal parasites were reported from 94 villages resulting in 63 deaths as against 86 villages accounting for 46 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,808 animals as against 6,238 animals during the previous month.

The rest of the livestock remained free from diseases during the month, and fodder and water were generally available throughout the State.

Press Note.

As it is feared that essential materials such as copper sulphate and casein required for spraying against Koleroga of areca are likely to be delayed, it is hereby published for the information of all areca garden owners that limited

supplies of spraying material will be sold at the various Koleroga depots of the Agriculture Department. The areca gardeners are requested to obtain these spraying materials and use them very economically in view of the shortage of stocks of these materials.

The mixture that is in use at present can safely be reduced to half its strength and 5 lbs. of copper sulphate and 5 lbs. of lime used to prepare 200 pureca seers of mixture instead of only 100 seers. The casein or other adhesive used must be of the same strength as for the strong mixture.

If in the meanwhile copper sulphate and casein indented for are received they will be rushed to all the Koleroga depots for being sold.

FIXATION OF PRICE OF LOOSE CEMENT.

The present selling prices of all brands of cement in the State are as follows :—

(1) For deliveries to stations in the Mysore State on the broad gauge upto and inclusive of Bangalore City and to all stations on the narrow gauge between Bangalore City and Bangarpet and for deliveries to the Civil Station, Bangalore.	Rs. 86 per ton in full waggon loads f.o.r. any Railway Station.
(2) For deliveries to stations elsewhere in the Mysore State.	Rs. 88-4-0 per ton in full waggon loads f.o.r. any railway station

These prices are for cement packed in gunny bags. During the last few months, the price of gunny bags has greatly increased and the producers have represented that it is not possible for them to sell cement in gunny bags at the current selling prices. In the present selling price, a sum of Rs. 11-8-0, is included on account of packing charges. The price of gunnies now is round about Rs. 130 per 100 bags, which works out to about Rs. 26 per ton of cement. Moreover, since control over price of jute goods has been withdrawn, it is not possible to have a fixed controlled price for packed cement. It has, therefore, been decided that prices should be fixed for loose cement only and that the producers should be allowed to recover actual cost of packing materials subject to a maximum for supplies made in new gunny bags. If supplies are made in paper bags or in old gunny bags, the cost of packing will be subject to negotiation between the producer and the consumer, subject to the ceiling of Rs. 26 per ton.

The controlled prices of cement in Mysore State are now therefore fixed as follows with effect from 1st June 1951 :—

(1) For deliveries to stations in the Mysore State on the broad gauge up to and inclusive of Bangalore City and to all stations on the narrow gauge between Bangalore City and Bangarpet and for deliveries to Civil Station, Bangalore.	Rs. 74-8-0 per ton, loose in full waggon loads, f.o.r. any railway station.
(2) For deliveries to stations elsewhere in the Mysore State.	Rs. 76-12-0 per ton loose in full waggon loads, f.o.r. any Railway Station.

Press Note.

Representations have been received by Government from the agriculturists in Malnad and forest areas of the State, requesting for the reduction of property qualifications prescribed for the grant of licences to possess breach-loading guns, as the muzzle-loading guns for which licences are being granted liberally are not very effective on wild animals which damage the crops. In view of these insistent demands and also in the interest of preservation of food crops, Government have reduced the property qualifications for the grant of licences to possess B. L. guns to the ownership of ten acres of land in the State and the licensing authorities in the State have been requested to dispose of the gun licence applications accordingly.

Crop Competition Fortnight.

In pursuance of the resolution passed at the Joint Meeting of the Advisory Board and the Governing Body of the Indian Council of Agricultural Research held at Dehra Dun on 8th May 1951, the Government of India have suggested that suitable steps should be taken immediately in the State to organise a "CROP COMPETITION FORTNIGHT". The Government of India attach considerable importance to Crop Competitions in view of their great potential importance in increasing the per acre yield and thereby assisting in solving the country's food problem to an appreciable extent.

According to the suggestion of the Government of India, a scheme suitable to the State has been formulated by this Government in consultation with the Government of India. The Competitions are proposed to be held at village levels, only in the State this year. These Competitions will be conducted by the Food Production Commissioner with the

co-operation of the Director of Agriculture and the Deputy Commissioners of Districts. All entries for such competitions shall be sent by the participants to the Deputy Commissioners of Districts concerned on or before 31st July 1951.

The above competitions are conducted with a view to help the Food Production Drive. Government, therefore, appeal for earnest co-operation so as to make the scheme successful.

The rules for the Competitions are given below for the information of the public :—

Rules Relating to Crop Competitions.

1 This competition applies to paddy grown during the monsoon of 1951.

2 The Competition will be conducted in all villages where paddy is grown on a wide scale.

3 The Competition is open to all growers who raise paddy on an area of not less than one acre in one single block. The area that will be actually estimated for yield will be limited to one acre. The unit of Competition should comprise of at least 20 contestants whether in the same village or group of villages.

4 Each intending competitor will be given an entry form at the beginning of the crop season by the local Agricultural Officer. These entry forms which require particulars of Survey Number, Anubavadar, the nature of lease, if any, etc., should be filled in by the competitor and returned to the local Agricultural Officer together with a treasury challan or cash payment of Rs. 1-4-0. Receipts for cash payment will be issued by the Department.

5 The entry forms should reach the Local Officer within a date fixed by the Department and indicated in the entry forms.

6 Soon after receipt of applications, a meeting of all the competitors or, as many as are available, will be called, where the details of the scheme and *modus operandi* for estimating the yield per acre by crop cutting experiments will be explained.

7 Judging committees will be formed for each competition area, each committee consisting of at least two non-officials.

8 After the crop cutting experiments are conducted, the crops thereof will be threshed and winnowed properly, weighed and measured green then and there. Only green weights will be recorded on the entry form and the record attested by the members of the committee, the local Shanbhogue and Patel and three Panchayetdars. The crop after weighment will be restored to the grower.

9 The results of the competition will be intimated to the winners by post. Only those who have produced the First, Second and Third highest yield per acre will be eligible for prizes.

The names of winners will be announced in the *Mysore Gazette*.

10 One price of Rs. 10 will be awarded for each village.

Press Note.

Health of Live-stock during May 1951.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Anthrax, Hæmorrhagic septicæmia, Sheep-pox, Ranikhet, Contagious-goat pleuro-pneumonia Foot and Mouth, and Rabies were encountered in the State during May 1951. Altogether 262 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 135 villages during the previous month. The number of outbreaks was highest in Bangalore, Tumkur and Mysore Districts, while Chikmagalur, Mandya and Hassan Districts were least affected. These diseases accounted for 965 animals of which 811 succumbed, as against 678 attacks and 519 deaths during the previous month. The departmental staff conducted 38,597 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention other prophylactic measures were adopted against Foot and Mouth disease.

Seven outbreaks of Rinderpest, of which two were among sheep and goats, were registered in Koppa, Kadur. Chitaldrug Jagalur, Tiptur and Chiknayakanahalli Taluks accounting for 52 attacks among cattle and 88 attacks among sheep and goats, of which 17 cattle and 42 sheep and goats succumbed. Prompt measures of control were undertaken by the Department to check its spread and 2,511 cattle and 821 sheep and goats in the infected villages and 4,087 cattle and 482 sheep and goats in 24 neighbouring villages were protected against this disease. The disease appeared to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 95 villages resulting in 9 deaths, as against 94 villages accounting for 63 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,462 animals as against 6,808 animals during the previous month.

The rest of the livestock remained free from diseases during the month and fodder and water were generally available throughout the State.

Press Note.

Kagodu Satyagraha and Dr. Lohia's Arrest.

Incorrect and exaggerated reports of the Kagodu agrarian trouble are being published in the Press by certain persons.

352

The public are aware that owing to certain differences between a landholder and his tenants in Kagodu Village, Sagar Taluk, Shimoga District, feelings became strained. Instead of settling differences in a constitutional manner, the raiyats attempted direct action and resorted to unconstitutional methods. They stopped cultivating the land and when the land-holders got the same cultivated by their own men, the raiyats seem to have, in pursuance of their plan, broken the fences and committed acts of trespass and mischief. The law and order position began to deteriorate on account of the violent activities of a few persons. It would appear that at this stage, some others interfered and contributed to the further deterioration of the position by joining the raiyats in the criminal acts. The police had naturally to intervene to maintain peace and to prevent acts of violence. They have acted with great restraint all along under the existing law of the land. The parties concerned would probably have arrived at an amicable settlement acceptable to both, but for the intervention of the outside elements, who wanted to exploit the situation.

The attention of the Government is drawn to the statement of Dr. Ram Manohar Lohia issued on the 15th of June 1951. The statement is full of inaccuracies.

This is a raiyatwari area and land-holders are owners of small extents of lands and they are not land-owners in the sense of Zamindars or land-lords in other parts of India. The majority of the individual holdings in this area are below 10 acres.

Government do not wish to deal with the allegations of trespass etc., contained in the statement as these are matters *sub judice*. Dr. Lohia's statement that the landholder is trespassing on his own lands is extra-ordinary. He does not say how the raiyats got any right to the land except that he would wish them to become the proprietors on the basis of the tiller becoming the owner. That is a reform which he may consider desirable. But the wish can confer no rights on the tenants. Dr. Lohia states that the raiyats started the Satyagraha on May 18th and it is surprising that having started it, they should now be complaining of consequences flowing from Satyagraha. After attaining freedom, when there are democratic and constitutional ways of effecting reforms open to people, it would be altogether wrong and subversive of order for them to take the law into their own hands.

The statement made by Dr. Lohia regarding lathi charge and commission of physical violence by the police is unfounded, the actual position being that many of the outsiders planned and proceeded to commit acts of violence with a view to keep up the excitement. The police have acted with the maximum of restraint to maintain peace. Dr. Lohia's reference to smuggling of foodgrains in this connection is not relevant except it be to suggest that the landholders would smuggle food-grains to Bombay if they had been paid the rent due to them by the tenants. The facts are that the procurement staff of Government had to procure from the tenants the surplus grain in their possession before it could disappear. The statement that 200 acres of land have been left uncultivated is exaggerated.

The police reports go to show that Dr. Lohia, in accordance with his own reported earlier declaration and his compatriots about nine in number, and about 100 others, trespassed into the land of Sri Guruve Gowda and removed the fence, which naturally attracted the process of law and he and a few of his friends have been arrested for cognizable offences.

It is extremely surprising that Sri Jai Prakash Narayan has flashed a statement from far off Patna on hearing of the arrest of Dr. Lohia, which according to reports, contains allegations, which to say the least are most unwarranted. The fact that Dr. Lohia had to leave for a foreign country in a few days cannot be an excuse for his committing an act which is deemed illegal, nor can it be a justification for his being exempted from the penalties which such an act may inevitably call for. Sri Jai Prakash Narayan's cry that liberty is in danger, in the circumstances, can make no meaning. Such slogans might have served a purpose in the past, when the country was under an irresponsible foreign power, but to-day with a democratic set-up, they naturally cannot deceive the discerning public.

The Government have repeatedly made it clear to both the parties that the differences between them should be settled amicably and in a constitutional manner, and that Government are not interested in taking sides in the dispute and that their sole interest is to ensure maintenance of peace, order and security, and sustain conditions suitable for the parties to arrive at an amicable settlement between themselves. They have given all facilities to the members of the public and the press to visit the area and see the conditions for themselves.

KAGODU SATYAGRAHA—SAGAR.

The attention of the Government has been drawn to some of the statements appearing in the Press that the under-trial prisoners of the Kagodu Sathyagraha are being ill-treated and have been denied proper accommodation, good food and other amenities like medical relief, etc.

Government repudiate these allegations and desire to remove the wrong impressions created by these statements appearing in the Press. Progress Report of the Co-operative Department for May 1951.

Co-operative Farms.—With a view to maximize the production from the lands on co-operative lines, each of the Co-operative Farming Societies started in the State have been asked to formulate crop plans, that is, the nature of crops to be raised, the extent and the lines on which they may be raised on a planned basis suited to the peculiar soil and other conditions of the lands in consultation with the local officers of the Agricultural Department and carry out such plans according to the programme.

During the month under review, Government have been pleased to lease a further extent of 200 acres (500 acres in all) in the Rudrapura Amrit Mahal Kaval, Channagiri Taluk, to the Sevanagar Tenancy Co-operative Farming Society, Rudrapura, started for the benefit of the landless people of the Banajara Community. The land is proposed to be divided into blocks of five acres for being leased out to each family. If the number of people of the family exceed five, it is proposed to lay-out sites for putting up sheds and cottages and roads, etc., for a Village Colony. As many as 52 persons have enlisted themselves as members of the society and a share capital of Rs. 840-12-0 has already been collected.

Another event of importance regarding Co-operative Farms is that Government have ordered the surrender of a total extent of 636 acres in Attigudda Kaval in Arsikere Taluk to the Revenue Department for leasing the lands to a Co-operative Farming Society consisting of landless persons. Steps have already been taken to start a Co-operative Farm at Attigudde.

In order to enable Sri B. Narayanappa, B.E., President, Kumbhapura Co-operative Farming Society, who has practical knowledge in the field of co-operative farming to visit and supervise the work of several Co-operative Farms started in the State, Government have been pleased to accord sanction for providing him with a conveyance of the station wagon type at the prevailing price and also for the payment of an allowance of Rs. 150 per mensem for the maintenance of the vehicle and a personal allowance of Rs. 100 per mensem. The expenditure on this account is debitable to the budget head "42. Co-operation—Post-war Development Scheme—C. Subvention to Co-operative Farms" for the current year.

Co-operative Training Classes.—With a view to train the candidates from the list approved by the Public Service Commissioner and to enable them to qualify themselves for the posts of the Inspectors of Co-operative Societies and the Auditors of Co-operative Societies, the training classes were inaugurated on 14th May 1951 and will continue for a period of two months. As many as 51 candidates have availed themselves of this opportunity and are attending the training classes. The candidates are imparted knowledge both in theory and practice of co-operation, banking and book-keeping. Sri B. T. Peethambara Rao, M.A., Assistant Registrar of Co-operative Societies, Bangalore Division, is appointed as Special Officer in charge of the training classes.

Industrial Co-operative Societies.—The Mysore Provincial Handloom Weavers' Co-operative Society, Bangalore, has quickened its pace of development. There were at the end of May 1951, 1,219 members who had subscribed a share capital of Rs. 1,06,910. The total working capital aggregated Rs. 1,29,350. It transacted business in silk amounting to Rs. 1,67,983.

The Mysore Provincial Cotton Handloom Weavers' Co-operative Society, Bangalore, has already started its work and bids fair to work zealously in the interests of the cotton handloom weaving industry in the State. Its membership consists of 101 Primary Weavers' Co-operative Societies and 25 other types of Societies besides 53 individuals, all told 179 members. The paid-up share capital amounts to Rs. 18,398 and the total working capital inclusive of the cash credit of Rs. 3,50,000 from Government exceeds Rs. 5·95 lakhs. Yarn of the value of Rs. 9,50,176 was released for distribution among the members during the past two months through the Primary Weavers' Co-operative Societies started all over the State.

House-building Co-operative Societies.—The Mysore Provincial Co-operative House-building Corporation, Ltd., Bangalore, has sanctioned loans to an extent of 21,500 during the month. Its total share capital amounted to Rs. 56,236 and the working capital exceeds Rs. 0·77 lakh.

Womens' Co-operative Societies.—In order to take stock of the progress achieved so far in the organisation of Women's Co-operative Societies and to find out ways and means to develop these organisations on right lines, it is proposed to convene a Conference of the representatives of the several Ladies' Co-operative Societies in the State under the auspices of the Mysore Provincial Co-operative Institute during the third week of July 1951.

Medical Stores Supply Co-operatives.—A notable feature during the month is the publication of a pamphlet as a supplement to Gramabhyudaya and Sahakara Patrika, envisaging the lines on which Medical Stores Supply Societies may be organised in important hospitals in the Cities of Bangalore and Mysore and also in the District Headquarter towns. The Princess Krishnajammni Sanatorium Co-operative Society and the McGann Hospital Co-operative Society, Ltd., Shimoga, have done well in the bulk purchase of drugs and medicines and distribution thereof among the patients at rates within their reach. Their activities are detailed in the brochure referred to above.

EXTENSION OF THE INDIAN MINES ACT TO THE MYSORE STATE.

The Indian Mines Act, 1923, has been extended to the Mysore State with effect from 1st April 1951. This Act which deals with Labour and safety in Mines will supersede Sections 21 to 33 and 37 of the Mysore Mines Act, 1906, which deal with such matters. The other provisions of the Mysore Mines Act, 1906, dealing with protection of mining property, special sanitation, sanitary administration of the mining area, etc., which fall exclusively in the State field of legislation and are embodied in Sections 4 to 20, 34 to 36 and certain other Sections, are unaffected by the extension of the Central Act; and, they will therefore continue to be in force in the State along with the Central Act with effect from 1st April 1951.

Press Note.

The basic scale of rations in the State which touched the lowest point of 8 ozs. per head per day in 1947 was, as a result of constant efforts made by Government to improve it, raised by stages to 9½ ozs. for the "A" and 12 ozs. for the "B" class population, respectively, at which it stood from 8th August 1950 to 12th February 1951 when, as a consequence of the worsening of the food position in the country and the adoption of an All-India overall scale of 9 ozs., it had to be stepped down to the latter level. The recent marked improvement in the food position in the Indian Union, however, has made a uniform 12 ozs. basic ration possible, as announced by the Honourable the Minister for Food and Agriculture in his broadcast to the Nation on 12th June 1951.

With an overall scale of 12 ozs. per head per day for consumers in general and 16 ozs. for the heavy manual workers brought into effect in the State from 1st July 1951, the basic scales of rations in Mysore have, after a number of years, been brought up to the All-India level, which in itself is gratifying and must also be welcomed by all as having brought the much-needed relief to the people in the State and raised their daily intake of food up to the minimum nutritional level.

It is, however, a matter for regret to the Government that it has not, at the same time, been possible to improve the rice component of the ration even to a slight extent. It is to be stated that the Government of India themselves have, in view of the low rice availabilities and poor expectations from imports this year, advised that in enhancing the overall scale to 12 ozs., the existing rice scales should not be raised. Since there appears to be a misapprehension on the point in some quarters, Government desire that the correct position with regard to the availabilities and requirements of rice in the State during this year should be made known to the public in the light of which it may be seen how, in spite of a general improvement in the overall food position, any immediate increase in the rice ration is still beyond the bounds of possibility.

The stock of rice in the State as on 1st July 1951, was 44,000 tons. With further expectations from local procurement and the balance of receipts from imports, the total availabilities of rice in the period from 1st July 1951 to 31st December 1951 would be about 56,000 tons. This, on a conservative estimate of the State's requirements, would be sufficient for only five months, while the quantity required to see the State through the remaining seven months until the next general (Kharif) harvest is not less than 70,000 tons at the present level of issue of 6 ozs. and 3 ozs. rice, respectively, for the "A" and "B" class population. Thus the State's rice deficit for this year stands at 14,000 tons, the early allotment from imports of which is being continually urged upon the attention of the Central Government. The Central Government, while being ready to allot the required quantities of wheat and milo, are not yet in a position to allot even the minimum of 14,000 tons of rice required to maintain the existing scale of rice ration in the State. Since an increase of rice scale by even an ounce per head per day involves an additional 10,000 tons for the rest of the year, improvement of the rice scale without a reasonable assurance of supply of the minimum additional quantity required must, by the limited availabilities being exhausted sooner, make a more drastic cut in rice ration inevitable in a few months. Since even the quantity of 14,000 tons of rice for which the State is already deficit is yet to be secured, an enhancement of the rice ration involving an additional commitment must necessarily await a further improvement of the overall rice resources of the country as a whole of which there are no indications at present. While being fully alive to the importance and urgency of improving the low rice ration. The State Government, in the context of the difficult and uncertain rice position set out above, had to refrain from undertaking it immediately. No efforts will, however, be spared to obtain from the Central Government the necessary additional supplies to enable the present scale of rice in the State being raised to the level of that in the neighbouring States as early as possible.

Government fully trust that on a due appreciation of the position explained above, the public will feel convinced that an immediate increase in rice ration was not possible.

(P. N. No. 88 - 7-7-1951)

Press Note.

It has come to the notice of Government that criticisms have been made in the public press to the effect that the *Ad Hoc* Committee appointed by Government for drawing up schemes for the relief and rehabilitation of such men of the Mysore State Forces as have not been absorbed in the Indian Army after the integration of the two said Forces, has not done any actual good to these ex-servicemen, that the Assistant Director of Re-settlement and Rehabilitation who has been appointed for securing relief for these affected men has not shown any useful results, and that the Government of Mysore have not gone about this business with the requisite promptitude or earnestness. As these writings are likely to create a wrong impression on the public mind and do not correctly represent the facts of the case, this note is published for the information of the public.

The Committee referred to above was appointed by this Government in March last and charged with the responsibility of drawing up schemes for the relief and rehabilitation of the affected men. It held five long meetings and after detailed discussions submitted various recommendations for the consideration of Government and forwarded to the Government of India for approval. These fall under 9 main categories, *viz.*,:

- Schemes for Alternative Employment,
- Re-settlement on land and land Colonization Schemes,
- Individual Settlers' Scheme,
- Starting of Co-operative Workshops and Lorry Services in all Districts,
- Auto-Riksha Service,
- Re-starting work at the Silk Filatures at Sidlaghatta and Mamballi, and
- Scheme for absorbing men in miscellaneous Individual business and smaller group enterprises.

These are expected to absorb about 1,531 men and the total estimated expenditure is Rs. 41,14,000. This report has met with the approval of the Government of Mysore: And pending its approval by the Government of India, the Special Officer attached to the Committee as well as the Assistant Director of Rehabilitation have contacted the concerned Departmental Heads, employers of labour and other non-official agencies, and enlisted their active support in the directions contemplated in the recommendations. The affected individuals themselves have been circularized to register themselves with the Assistant Director, furnish the necessary particulars and indicate their differences as regards the mode of employment or kind of assistance required. And, as was reported to the Committee when it met again on 5th July 1951 as against 2,551 officers and men released from the Ranks, 1,450 have registered themselves so far, 377 of them have been re-employed already, and 13 have been undergoing training at Bangalore, Danvangere and Bhadravati. Arrangements have been made to get 60 other men trained in Vehicle Mechanic and allied trades at the E.M.E. Centre at Bangalore. About 300 men are so far reported to be willing to settle on land and it is proposed to release, in the first instance, about 600 acres of a Kaval land for allotment to the first batch of these applicants, after getting the land cleared by Bull-dozers or tractors.

Other relief that is proposed to be afforded immediately includes monetary assistance to such of the men as have signified their intention to open Ration Shops, Floor Mills, Cloth Shops, Provision Shops and Hotels, etc.

Yet other steps that the Committee are taking relate to registration of these ex-servicemen by the Employment Exchange on a preferential basis. Simplification of the existing procedure in respect of registration by the Employment Exchange, absorption in Railway Service, securing for the Committee the status of an Employment Exchange for purposes of recommending men for employment on a priority basis, requesting Government to waive age limits and re-employ ex-servicemen in Government Departments, immediate refund of assured sums by the Government Insurance Department against policies held by them, etc.

Pending orders on the detailed schemes recommended by the Committee, this Government have passed orders placing at the disposal of the Special Officer, an advance of Rs. 25,000 with which to grant immediate financial assistance in the most deserving cases and to meet other expenditure of an emergent nature.

It will thus be seen that the Committee has formulated its recommendations with the greatest possible speed and that the Assistant Director of Rehabilitation has been earnestly addressing himself to the task of implementing them, and the Government have taken, and will continue to take, all possible action to relieve and rehabilitate the Officers and Men under reference.

I am directed to enclose herewith a copy of Notification No. P. 146 (7) 51, dated 25th May 1951, received from the Joint Secretary to Government of India, Ministry of Works and Supply, New Delhi, regarding the removal of all restrictions on the purchase of Jute materials and to state that indents for the above may be sent to this office for arranging supply in accordance with the Stores Purchase Committee rules.

Copy of the letter No. P. 146 (7)—51, dated the 25th May 1951, from the Joint Secretary to the Government of India, Ministry of Works Production and Supply, New Delhi, to the State Governments, etc.

Subject :—Purchase of Jute Goods on behalf of the State Governments and Quasi-Government Organisations such as Port Trusts, Municipal Corporations, etc.

I am directed to refer to Circular letter No. P. 11—146 (6)—49, dated the 28th February 1950 of the late Ministry of Industry and Supply, addressed to all the State Governments and Chief Commissioners on the subject noted above and to say that the Government of India is of the view that as the supply position of raw jute has of late improved considerably and as the price control over jute and jute goods has also been removed, there should be no difficulty now in procuring supplies of jute goods in the normal way.

The Government of India have, therefore, come to conclusion that it is no longer necessary for the State Governments to purchase their requirements of jute goods through the Purchasing Agency of this Ministry. The State Governments and Chief Commissioners are now free to obtain their requirements directly from the industry. The States who still desire to obtain their requirements centrally through the Ministry of Food and Agriculture may, of course, continue to do so.

Press Note.

It is hereby notified for the information of the public that in view of the acute scarcity of gunny bags for the packing of cement, in the State, it is found very difficult by the Mysore Iron and Steel Works, Bhadravathi, to ensure regular supplies of cement to all the places in the State and if the supplies from the factory have to be maintained uninterruptedly, the return of empty gunny bags by buyers to the maximum extent possible is quite necessary. The Bhadravathi Works are prepared to give a reasonable price of Rs. 50 to Rs. 60 per 100 bags, for the present, depending on the condition and serviceability of the gunny bags.

The public are, therefore, requested to co-operate with the cement manufacturers and to return all the available empty cement gunny bags with them to the licensed cement stockists within their jurisdiction who will pay a reasonable price for the same and make the situation easy, so that the supply of cement from the Bhadravathi Works to the consuming centres may not suffer for want of gunny bags.

PUBLIC ADVERTISEMENTS

OFFICE OF THE PRINCIPAL INFORMATION OFFICER TO THE GOVERNMENT OF MYSORE, OLD PUBLIC OFFICES, BANGALORE.

Press Note.

PROGRESS REPORT UNDER FOOD PRODUCTION DRIVE FOR THE FORTNIGHT ENDED 30TH JUNE, 1951.

I. Weather Conditions.

The Raiyats have prepared their lands for dry crops and are awaiting showers to take up the sowing operations in the Maidan Districts. Rainfall which was fair in the previous fortnights has not been so during this fortnight, with the result that sowing operations have been delayed to a certain extent. The standing crops of paddy, ragi, groundnuts, etc., in the Districts of Hassan, Shimoga and Chickmagalur are stated to be in good condition. Vaisakhi paddy and irrigated ragi are being harvested in Kolar District.

II. Works Schemes.

A. Irrigation Works:—Sinking of New Wells:—Twenty wells are stated to have been completed during the fortnight in Kolar District and a subsidy of Rs. 1,530 was paid.

B. Construction of New Major Irrigation Works:—The 15 big new irrigation works which are under construction are in rapid progress. In the case of Kanva Reservoir balance works and Nelligudda tanks only the question of payment of land compensation is pending. A total area of 3,560 acres is under cultivation under the above two tanks. One hundred and sixty-eight acres of new lands have been supplied with water under Irkasandra tank during this year. Under Honnamachanahalli tank an extent of 725 acres of new land is brought under cultivation. The remaining works of Budigere tank are nearing completion. The second stage works of Seegehalla Anicut are in good progress. The progress of several works is stated to be retarded for want of materials, like lorry tyres and tubes, cast iron pipes, etc., and Government have been addressed about arranging supplies to the former recently. Water has been allowed under the Nugu Left Bank Channel to irrigate 560 acres and further arrangements have been made to get 400 acres of additional lands under cultivation.

C. Repairs to old tanks:—Nearly 428 restoration works are in different stages of progress in seven divisions. Three minor tank restoration works were completed in Shimoga Division, benefiting an area of about 428 acres.

During the year 1950-51 as many as 145 tanks were restored to standard conditions. A large number of tanks were also repaired and brought up to working condition.

D. Desilting of tanks:—The desilting of Attur Major Tank in Hosakote Taluk is under progress and nearly 7,000 cubic yards of silt has been removed. In Shimoga Division out of 20 tanks—programmed 7 works were completed during May 1951 benefiting a total area of 206-00 acres. An outlay of Rs. 7,070 was incurred on these works during the fortnight in Shimoga Division. In Kolar Division as many as 87 tanks are being desilted by engaging manual labour.

E. Installation of Persion Wheels, Rahats, Electric Pumps and Diesel Oil Engine Pump sets:—One more Government owned Tractor and three more Diesel Oil Engine Pump sets were supplied to Raiyats under Hire Purchase System during the fortnight bringing the total number issued to 20 and 38 respectively during this year.

Action is being taken by this Department for the supply of Electrical pump sets other than those that are now being supplied to the Raiyats through the Electrical Department, as sanctioned by Government recently. Six such applications were received in this office during the fortnight and agreements relating to them are under execution.

F. Construction and Improvement of Dams and Channels:—The improvement works to the River, Tank and Feeder Channels are in progress as per details furnished during the previous fortnights.

G. Pumping Installations on River and Channels:—

At Gollarahalli in Honnali Taluk ...	This work is in progress. Excavation of the well is completed and concrete has also been laid for the foundation. Outlay incurred during the fortnight is Rs. 1,000.

H. Other Irrigation Works:—Under land improvement schemes, the reclamation of marshy lands in Mandya Division is in progress. The construction of pick-ups, etc., and the temporary bunding of three tanks was also in progress.
